## Q. How do I make changes to an existing internet connection in Windows Vista?

A. Please follow the guide below to make changes to your connection setup in Windows Vista. You may need to do this when you have changed the password on your account or have changed the service type (e.g. FLETS ADSL to BFLETS Mansion) on your account and need to enter the new connection ID.

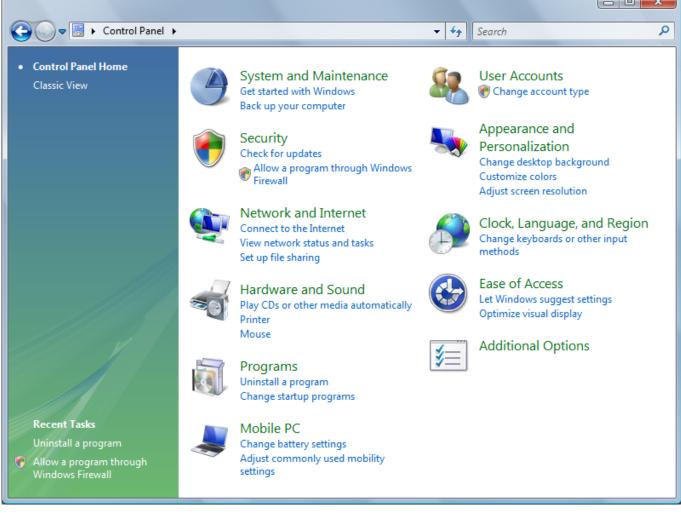

NOTE - These instructions apply when you are connecting your computer directly to the NTT device. If you are using a router, please refer to the manufacturers guide to configure this device.

1. Click on the "Start Menu" and click on "Control Panel" here

2. Click on "Network and Internet" in the Control Panel

Page 1 / 6 (c) 2024 Rakuten Communications Corporation <supporte@gol.com> | 2024-04-24 07:54 URL: https://faq-e.gol.com/index.php?action=artikel&cat=0&id=47&artlang=en

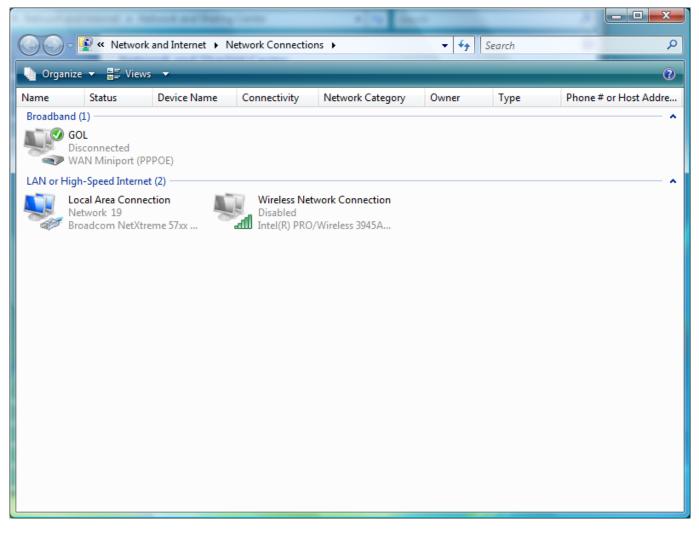

3. Click on "Network and Sharing Center"

o	
Control Panel Home System and Maintenance Security	Network and Sharing Center           View network status and tasks   Connect to a network             View network computers and devices   Add a device to the network   Set up file sharing
Network and Internet Hardware and Sound Programs	Internet Options Connect to the Internet   Change your homepage   Manage browser add-ons   Delete browsing history and cookies
Mobile PC User Accounts Appearance and	Offline Files Encrypt your offline files   Manage disk space used by your offline files

5. You should see the connection you have created previously listed here. In this case it has been named "GOL" and is referred to as a "WAN Miniport (PPPOE)" type connection. Double click on this icon.

NOTE - If you do not see this icon, you will need to create a new connection. Instructions on how to do this can be found <u>here</u>

6. In the "Connect GOL" window you will see your connection ID in the "User name:" field and a box explaining "[To change the saved password, click here]". You can now either update your connection ID in the "User name:" field or change the saved password.

Connect GOL	
<u>U</u> ser name:	user-id@b-man.vips.gol.com
Password:	[To change the saved password, click here]
✓ Save this us ● Me only	er name and password for the following users:
	who uses this computer
Connect	Cancel Properties <u>H</u> elp

After you have made any changes, click on the "Connect" button to establish a connection. These changes will be saved and you should now be connected to the internet if the information you have entered is correct.

If you have any problems connecting, please refer to our other FAQs or contact us.
